EDUCATION

Shri Bhagubhai Mafatlal Polytechnic and College of Engineering

Diploma in Computer Engineering

Mumbai, India

June 2024 – Present

PTVEM School

SSC (Class X), 95.4% — Top 5% of graduating class

Mumbai, India

June 2014 – May 2024

PROJECTS

Pragati Connect: Platform for Empowering India's Informal Workforce

April 2026

Python, Dart, AWS Bedrock, AWS Lambda, GCP Tools

Lead Developer

- Led a team of 3 developers to build a mobile app that helps informal workers in gauging the value of their work and services against a broad market to get fair pricing using AI
- Built a Flutter-based mobile application supporting conversations in 7+ Indian languages through AI-powered speech and translation services
- Integrated the ability to instantly find the local market value of any product just by snapping a photo
- Designed and implemented a cloud-native backend integrating AWS Bedrock, Lambda, authentication services, speech processing, image inference, and persistent user data storage

Greenova: Environment Conscious Software Ecosystem

April 2026

Python, JavaScript, Dart

Co-Lead Developer

- Collaborated with a team of 4 developers to create an Environment Conscious Ecosystem
- Developed backend AI inference pipelines and data collection systems for environmental impact analysis and model fine-tuning
- Helped develop the backend for the mobile app used to calculate the Carbon Footprint of an individual by noting user purchases and everyday actions relative to the environment

DreamCatcher: Multilingual AI Career Guidance Platform

September 2026

Python, Flutter, Dart, FastAPI, PostgreSQL, Google Cloud, Vertex AI

Lead Developer

- Built an AI platform helping rural students discover scholarships, courses, exams, internships, and career pathways
- Implemented browser-based voice counselling with Google Cloud Speech-to-Text and Text-to-Speech

HONORS & ACHIEVEMENTS

1st Place - Taqneeq Hackathon | Team Lead

March 2026

- Placed first at a Hackathon with teams from over 3 Countries and 45 Universities
- Round 1 - Built AtherOps: A multi-agent system that automatically detects, diagnoses, and remediates production incidents in real-time using LangGraph
- Round 2 - Built SchnellXAI: A full-stack, AI-powered logistics management platform built around a five-agent pipeline that continuously monitors, reasons about, and acts on supply chain disruptions for logistics operations

1st Place - Build-it On Hackathon | Team Lead

March 2026

- Placed first in the AI for Social Impact and Sustainability category
- Scraped and integrated environmental impact data of materials and cross-referenced product listing information and used AI to generate impact scores and reports which reflected right next to the product on websites like Amazon and Flipkart

1st Place - Regional & State Level Team Chess | Team Member

2025-2026

- Placed first at Regional and State Level in a team of 5 members in Diploma Chess Tournaments
- Scored a perfect 5/5 to claim victory in the finals

TECHNICAL SKILLS

Languages: Python, C, Java, SQL (MySQL), JavaScript, HTML/CSS, LaTeX

Frameworks: React, Node.js, FastAPI

Developer Tools: Git, GitHub, Google Cloud Platform, VS Code, Visual Studio, PyCharm, AI Tools

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Tensorflow, PyTorch, LangGraph, LangChain

Language Profile: English (TOEFL iBT 6.0/6.0), Hindi, Marathi, Spanish (A2)
